DETAILED ACTION

Allowable Subject Matter

1. Claims 1-11, 13-15, 17-20 and 22-24 (Renumbered as 1-21) are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant claims the determination and use of a response curve of a power source for a circuit in adjusting clock delay on a clock distribution network. This response curve permits an integration over time of the power supply noise to assist in calculating the optimal clock delay in the system. There is neither evidence nor motivation suggesting that the power response curve should be utilized in this fashion along with the clock and data delays and sensitivities, so that the effects of power supply noise may be reduced. Accordingly, it would not have been obvious to a person of ordinary skill in the art to arrive at the invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
